CMCS launches new unit in Qatar

TRIBUNE NEWS NETWORK

DOHA Collaboration, Management and Control Solutions (CMCS), a leading provider of Project and Portfolio Management solutions and the exclusive authorized representative of Primavera Solution in the Middle East, recently launched the latest addition to its regional operations, PMCS, during a road show held recently at the Doha Marriott Hotel in Qatar.

PMCS is the newest addition to CMCS' expanding roster of regional branches. A few weeks ago the Project Management solution provider introduced a new sister company in Lebanon, PMAG, to deliver its impressive range of project management services, which include professional consultancy services, organisational project management maturity assessment, project management office set up and roll out, and development of integrated project management methodology and procedures, among others. PMCS will offer the same services to Qatar's rapidly growing project management market.

"As one of the richest countries in the Arab World, Qatar represents a key market in our regional expansion efforts. Engineering and construction projects will of course be prominent as oil is the cornerstone of Qatar's economy, but the country's aggressive diversification initiatives will allow

Bassam Samman, CEO and Founder, CMCS.

us to offer our superior project and portfolio management services to a broader range of industries.

Through state-of-the-art applications from Primavera Systems, we will offer clients in this region only the best integrated solutions for their project requirements," said Bassam Samman, CEO & Founder, CMCS.

CMCS has been conducting a series of road shows under the theme 'Empowering Project Driven Businesses' to enlighten participants on the benefits of integrated information system solutions for project management.

Around 120 professionals from various industries attended the introductory road show for PMCS, which emphasized the importance of Primavera Solution as well as Hard Dollar and Synchro software solutions.
