## Management firm CMCS enters Jordan market

### DUBAI Staff

Collaboration, Management and Control Solutions (CMCS), a provider of Project and Portfolio Management solutions, recently entered Jordan's expanding project management (PM) market through the establishment of its sister firm, Anchor for Project Management Consultancy (APMC).

"The rapid increase of projects in Jordan, particularly in the housing sector, has boosted local demand for project management services," said Bassam Samman, Chief Executive and Founder, CMCS.

"APMC will allow us to introduce our broad and reliable portfolio of tools, techniques and services to this rapidly growing market.

"One area we would like to focus on is project management training; we have in fact conducted several seminars across the region to enhance the knowledge and

Bassam Samman

skills of PM practitioners. We hope that through APMC, we can increase the ranks of professional, experienced and highly-competent PM resources in Jordan," said the CEO.

The number of project management professionals (PMPs) in Jordan has been increasing rapidly since 2002, reflecting the expanding demand for qualified PM services. The country currently has around 400 PMPs, a figure that continues to grow amid the vast number of planned domestic proj-

ects. CMCS will focus on further accelerating local demand for professional Project Management services via APMC.

APMC will provide complete Project Management solutions covering software applications, training and consultancy. APMC will also provide organisations with expertise in the field of Planning and Scheduling to supplement this rapidly increasing requisite. APMC expertise will support clients with all required planning services that may include the preparation of detailed and master schedules, progress reporting, executive reporting, and extension of time claims preparation and assessment.
